Respected Sir/Madam

My name is Nachiketa ; a 4th year undergrad in CS. I went through the links that were provided under the project “Deep Regression techniques for Decoding Dark Matter” and hence i believe i would be a suitable candidate in taking this project forward .

I have had 2+ years of machine learning experience with techniques ranging from working with CNN's to more advanced techniques such as LSTMs, DC GANS and even working with spectrograms in processing images.

Therefore i believe i would be fit for the project and hence would be waiting for a test so that i could prove my skills.

Thanking you

Nachiketa Raina
